Answers: Standard Normal Areas Practice

Each answer comes from the spreadsheet formula shown under it. The same answers are in NormalAreasPractice-Answers.xlsx. With the printed table you may get a last digit that is off by 1.

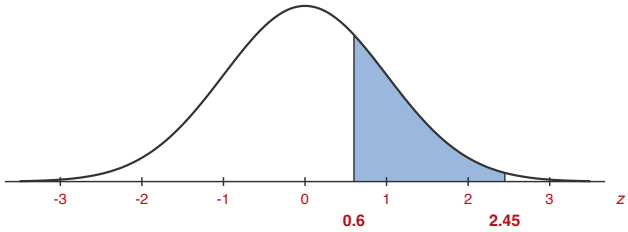

Area	Spreadsheet formula
Left tail area	`=NORMSDIST(z)`
Right tail area	`=1.0-NORMSDIST(z)`
Area between z_1 and z_2	`=NORMSDIST(z2)-NORMSDIST(z1)`

1. Find the right tail area for $z = 1.73$

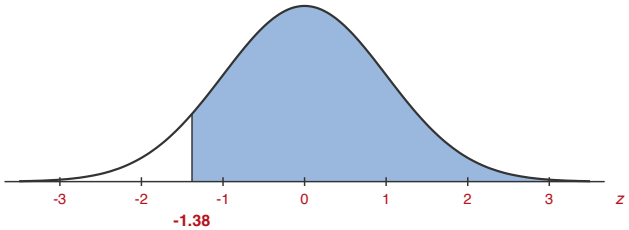

Area = 0.0418
`=1.0-NORMSDIST(1.73)`

2. Find the area between $z = 0.6$ and $z = 2.45$

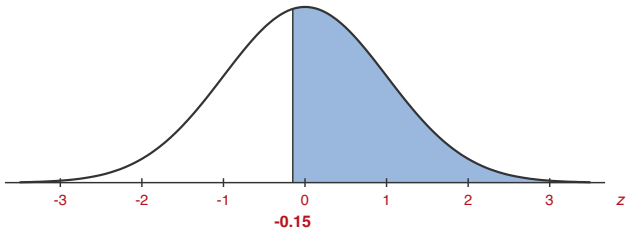

Area = 0.2671
`=NORMSDIST(2.45)-NORMSDIST(0.6)`

3. Find the area to the right of $z = -1.38$

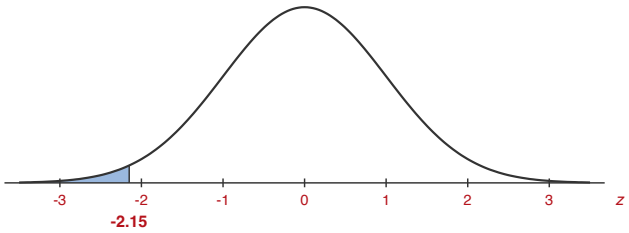

Area = 0.9162
`=1.0-NORMSDIST(-1.38)`

4. Find the area where $z > -0.15$

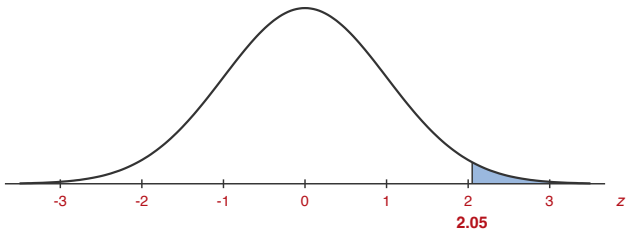

Area = 0.5596
`=1.0-NORMSDIST(-0.15)`

5. Find the left tail area for $z = -2.15$

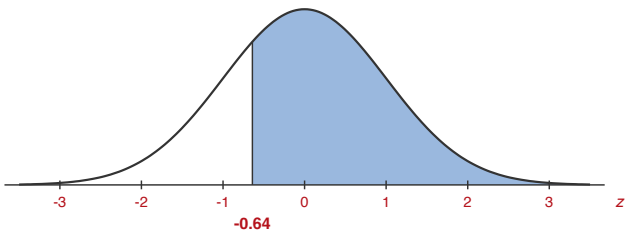

Area = 0.0158
`=NORMSDIST(-2.15)`

6. Find the area for z greater than 2.05

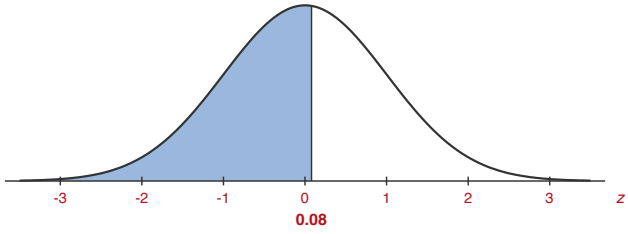

Area = 0.0202
`=1.0-NORMSDIST(2.05)`

7. Find the right tail area for $z = -0.64$

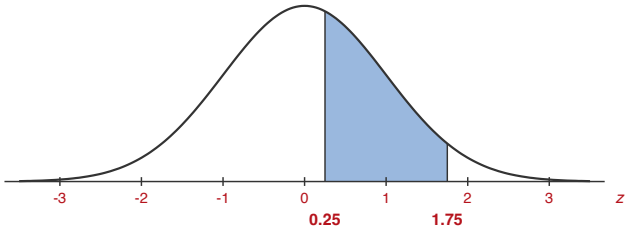

Area = 0.7389
`=1.0-NORMSDIST(-0.64)`

8. Find the area to the left of $z = 0.08$

Area = 0.5319
`=NORMSDIST(0.08)`

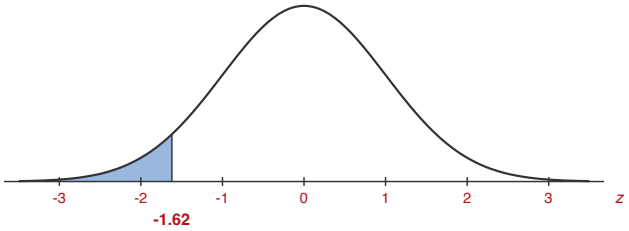

9. Find the area where $0.25 < z < 1.75$

Area = 0.3612

```
=NORMSDIST(1.75)-NORMSDIST(0.25)
```

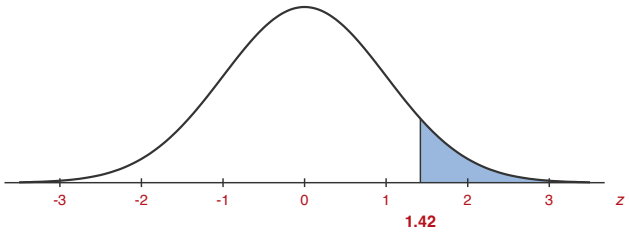

10. Find the area where $z < -1.62$

Area = 0.0526

```
=NORMSDIST(-1.62)
```

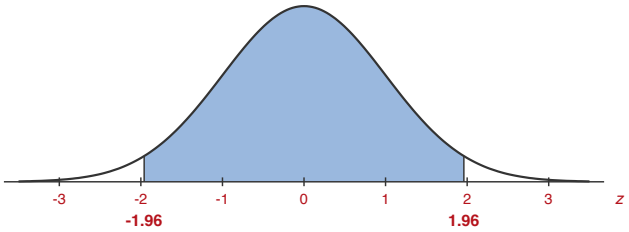

11. Find the area to the right of $z = 1.42$

Area = 0.0778

```
=1.0-NORMSDIST(1.42)
```

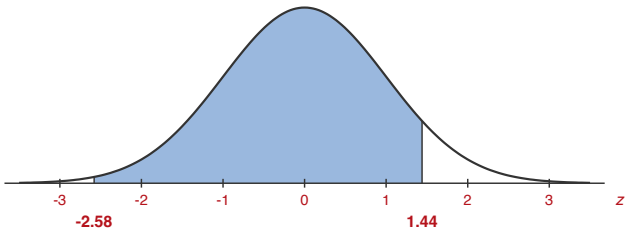

12. Find the area for z between -1.96 and 1.96

Area = 0.9500

```
=NORMSDIST(1.96)-NORMSDIST(-1.96)
```

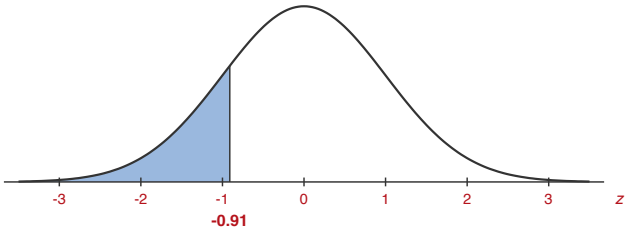

13. Find the area for z greater than -2.58 and less than 1.44

Area = 0.9201

```
=NORMSDIST(1.44)-NORMSDIST(-2.58)
```

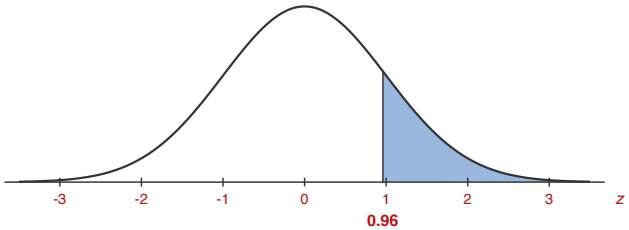

14. Find the area for z less than -0.91

Area = 0.1814

```
=NORMSDIST(-0.91)
```

15. Find the area where $z > 0.96$

Area = 0.1685

```
=1.0-NORMSDIST(0.96)
```
