orders

order_id	customer_id	product_id	order_date
1	1	3	2025-03-10
2	2	1	2025-03-12
3	3	4	2025-03-15
4	2	4	2025-03-18
5	1	2	2025-03-20
6	2	3	2025-03-25

Questions

1. Show the `first_name` and `last_name` of every customer who placed an order between 2025-03-15 and 2025-03-21. List each customer only once.

2. For every order of a product that costs more than $80, show the customer's `first_name`, the product's `name`, and the `order_date`.

3. For each product that was ordered at least once, show its `name` and `total_revenue`, its price times the number of times it was ordered, sorted from highest `total_revenue` to lowest.

4. Show the `first_name` and `num_orders` of every customer who placed more than one order.

5. Show the `first_name` and `last_name` of every customer who has never ordered the Cotton T-Shirt.

Worked example. Show the `name` and `price` of every product Jane Smith ordered, sorted from lowest price to highest.

1. In `customers`, Jane Smith has `customer_id` 2.
2. In `orders`, `customer_id` 2 appears in orders 2, 4, and 6. Their `product_id`s are 1, 4, and 3.
3. In `products`, look up 1, 4, and 3: Silk Blouse (89.99), Cotton T-Shirt (29.99), and Cashmere Sweater (149.99).
4. Write the `name` and `price` of each and sort from the lowest `price` to the highest.

name	price
Cotton T-Shirt	29.99
Silk Blouse	89.99
Cashmere Sweater	149.99
