Z-Values on a Number Line

The mean is $\mu = 27$ and the standard deviation is $\sigma = 4$.

a) Fill in the x-values for each z-value:

b) Find the z-score of each x-value below, using $z = \dfrac{x - \mu}{\sigma}$. Then mark x with a dot on its number line and check that your z-score matches where the dot lands.

$x = 33$: $z =$ _____

$x = 30$: $z =$ _____

$x = 22$: $z =$ _____

$x = 20$: $z =$ _____
